Phnom Penh, Sen Sok

EDUCATION

National Polytechnic Institute of Cambodia

As a software engineering student
2023 -2026

High School

Angsdok High School
2017 -2023

SKILLS

- Next.js
- Laravel
- React Native
- React.js
- Node.js
- MySQL
- SQL Server
- Type Script
- Java Script
- C#
- Docker

LANGUAGE

Khmer

English

ABOUT ME

Driven Full-Stack Developer skilled in TypeScript, Next.js, Laravel, React Native, and Docker. Adept at designing normalized databases and building full-stack applications with dynamic UI state management and Cloud storage integration. Committed to writing clean code and solving complex software issues to deliver seamless user experiences.

PROJECT EXPERIENCE

Engineered a variety of web and mobile software solutions utilizing modern frameworks and best practices. Detailed source code, commit history, and project repositories are available on GitHub at https://github.com/Ratanatroeun003

Recent Project

Next-RBAC System (Role-Based Access Control & Authentication Platform)

https://github.com/Ratanatroeun003/next-rbac-system

Overview: Built a modern, scalable authorization and authentication application focusing on a highly secure user management workflow and resilient error handling.

Key Responsibilities & Features:

- Designed and implemented secure sign-in, sign-up, and password recovery workflows using Next.js Server Actions and NextAuth.js.
- Applied rigorous data validation and type safety using TypeScript, Zod, and React Hook Form.
- Created dynamic UI components with Tailwind CSS, featuring responsive inline alert banners and automated triggers for email verification resending.
- Optimized user experience (UX) through clean exception management, guard clauses, and real-time feedback via Sonner toasts.

Tech Stack: Next.js, React, TypeScript, NextAuth.js, Tailwind CSS, Zod, React Hook Form, Node.js.
